

Penetration Test Assessment

A CTI Security Advisory Service

BENEFITS

Our Penetration Test Assessment helps your business determine the effectiveness of your network security program. It allows you to:

- Intelligently manage vulnerabilities. Penetration testing provides detailed information on exploitable security threats, so they can be prioritized for remediation, security patches applied and resources allocated where they are needed.
- Avoid the cost of downtime. Testing helps to avoid financial costs of remediation efforts, legal activities, lowered productivity and more by identifying and addressing risks before breaches occur
- Meet regulatory requirements and avoid fines. Detailed reports can help organizations address some of the requirements of HIPAA, Sarbanes-Oxley, PCI, GDPR, and more.
- Preserve corporate image and customer loyalty. Penetration testing helps customers avoid data incidents and protect their reputation and trustworthiness.

SERVICE OVERVIEW

A Penetration Test Assessment can be used to evaluate the effectiveness of an existing security network. Our technicians use a mix of manual and automated testing techniques in an attempt to gain access to information without the knowledge or permission of your business.

The assessment can be used to evaluate the external security perimeter and identify actionable solutions for strengthening the security infrastructure to reduce the possibility of an external hacker compromising information unknowingly.

While network threats have existed for decades, the time between vulnerability and exploit is shrinking. Stories of cybercrime, threats to privacy and computer hacking are in the news weekly. Organizations are being forced to spend more money on investigations, notifications and response when sensitive and confidential information is lost or stolen. It is reported that the average cost to a company was \$3.5 million US dollars¹ and 15 percent more than what it cost last year!

Penetration tests can be an effective tool for your business to identify high-risk vulnerabilities that may be difficult to detect. Gain the peace of mind that your network security is effective.

OUR CLIENTS

We understand that our clients have choices and we partner with them to provide high quality services at a fair value. Their success is our success.

CONTACT US

CTI is a provider of security, platform and analytic solutions located in Burlington, Mass., serving customers in New England, Metro New York, Metro Atlanta, and beyond.
